

Health and Safety Policy

Savannah considers that a high standard of Health and Safety performance by everyone who works for or with us is critical to the success of our business. Health and Safety are essential requirements of our operations and must rule all our activities.

The Savannah Health and Safety Policy aims to promote a safe working environment and to protect all workers. The Health and Safety Policy aims to achieve this by:

- Ensure that all our operations comply with applicable health and safety laws and regulations.
- Identify hazards, assess the risks, and implement appropriate controls to protect all personnel involved in our activities.
- Promote a culture where accidents, incidents and near misses are promptly reported and investigated, and the lessons learned are shared throughout the organisation.
- Developing measurable Health and Safety objectives and key performance indicators as an effective means of monitoring, measuring, and improving our Health and Safety performance.
- Ensure our contractors, service providers and consultants follow Savannah Energy's policies and standards.
